October 2026

1. Summary

- The total tourist tax collected by all 265 municipalities in Bulgaria for 2025 is 18 039 593,42 € (35 282 378 BGN).
- Revenue is highly concentrated: the top 5 provinces (Burgas, Sofia City, Varna, Blagoevgrad, Dobrich) account for 76,3% of total revenue, and Burgas Province alone – 30,0%.
- The top 6 destinations – Sofia, Nessebar, Varna, Bansko, Balchik and Velingrad – together collect 11 243 686 €, or 62,3% of the tax in the country.
- Bed-base efficiency varies many times over: Sofia generates 188,0 € of tax per bed, while Nessebar – 43,1 € per bed, despite the largest bed base (71 436 beds per NSI).
- The administrative audit shows that 212 municipalities have complete data, 37 report zero revenue, and 16 have gaps – partial, unreadable or missing reports (see Notes).

2. Methodology and Sources

The data were collected from the published cash reports on the execution of municipal budgets for 2025. Amounts are in BGN as per the reports and converted to euro at the fixed rate 1 € = 1,95583 BGN. The number of beds for the leading destinations is based on NSI data, reflecting the average annual number of permanently active beds (in operation), not the maximum peak capacity of municipalities during the active season. Where a report is incomplete or missing, this is marked with a note number [n] in the tables, and the full text is in the “Notes” section at the end of the document.

Top 6 destinations – data

Destination	Revenue (€)	Beds (NSI)	€ / bed	New budget (€)
Sofia	3 088 784,30	16 430	188,00	2 547 040
Nessebar	3 081 340,40	71 436	43,13	2 540 902
Varna	2 348 044,56	39 420	59,56	1 936 219
Bansko	948 453,09	15 890	59,69	782 103
Balchik	927 360,76	9 810	94,53	764 710
Velingrad	849 702,68	7 035	120,78	700 673

Note: for Varna, the revenue of Varna Municipality (2 348 044,56 €) is used, not that of Varna Province.

Note on the bed base: The number of beds used per NSI corresponds to the average annual volume of permanently active beds in operation for 2025. This approach ensures the accuracy of the “Tax revenue per bed” indicator, as it excludes seasonal fluctuations and beds open only temporarily for 2-3 months in seaside and winter resorts.
